Reply to Office Action of 10/20/2006

## **Amendment to the Claims:**

The listing of claims will replace all prior versions, and listings of claims in the application:

## **Listing of Claims:**

- 1-6. (Canceled)
- 7. (Currently Amended) A system including a user operable portable radio communication device and an object device connected to a network, the portable radio communication device comprising:
- a transmitter for transmitting an identity tag indicative of the identity of the portable radio communication device;

the object device comprising a receiver, and a processor; and wherein

in response to the receiver receiving an identity tag transmitted from the portable radio communication device, the processor <u>being configured to use the identity tag to obtain address information via the network and authorize authorizes</u> the downloading of information via the network to a remote server or terminal identified by <u>the address</u> information associated with the identity tag.

8. (Currently Amended) A user operable portable radio communication device comprising:

a transmitter for transmitting an identity tag indicative of the identity of the portable radio communication device, a transmitted identity tag being receivable by a receiver of an object device and being operable to enable the object device to obtain address information via a network and to cause downloading of information from the object device via [[a]] the network to a remote server or terminal identified by the address information associated with the identity tag.

9. (Original) A user operable portable radio communication device according to claim 8, wherein the portable radio communication device is a passive device.
